Which Language is Better?

This is incomplete question!!

It Depends on your need

You can use many programming languages at the same time.

Programming Languages

Are only tools !!

Mastering them alone will not

make you a good developer !!

Mastring a programming language is only

5%

of learning programming!

DONT WASTE YOUR TIME LEARNING MORE THAN ONE PROGRAMMING LANGUAGE!

Programming Languages

DONT WASTE YOUR TIME LEARNING MORE THAN ONE PROGRAMMING LANGUAGE!

If you master one language you can learn any other language in less than a month's time

All programming languages share the same concepts, the only difference is Syntax/Tools.

LEARN THE RIGHT WAY

Programming is...

A process of creating a set of instructions that tell a computer how to perform a task.

It all depends on:

Logic	**Analysis**	**Thinking**	**Ability to find solutions**

Regardless of any programming language!
